### **Biography:**

Danijela Barić has a Bachelor's, Master's and Doctoral degree in Transportation from the University of Zagreb, Faculty of Transport and Traffic Sciences. After graduation as a transport engineer she worked at the Institute of Transport and Communications in Zagreb and since 2008 she is working at Faculty of Transport and Traffic Sciences. Her major research field is multi-criteria decision making in transportation with the special interest in planning smart and safe transportation and transport education. She published more than 70 papers at conferences and international journals and participated in more than 60 scientific and professional projects in cooperation with industry and public institutions. In last few years, she is deeply involved in education and promotion of safety on LCs. She was project manager of several projects regarding safety at LC, one of them was *Implementation of Measures to increase the Safety of the most Vulnerable Road Users at Level Crossings*, which has been implemented within the *National Road Traffic Safety Programme of Republic of Croatia 2011 – 2020*. With her team she was responsible for organization of ILCAD 2018 in Zagreb.

### **Title of presentation:**

**Bus Drivers vs. Train Drivers: Different Perspective of Level Crossings**

### **Summary:**

*Bus drivers vs. train drivers. What is different in their profession? What are the differences in their education? What are the differences in their daily work? Whose job is tougher? What about their experience with Level Crossings? Who must deal with more trespassers? Who deal with more accidents? Do they violate traffic regulations? The answers of this questions will be presented, according to collected data of bus drivers and train drivers in Croatia.*

Act safely at level crossings
