

Herbert Ofner

**Communications expert - ÖBB
Infrastructure**

herbert.ofner@oebb.at

<https://infrastruktur.oebb.at>

Biography:

Herbert Ofner is working at the ÖBB-Infrastruktur for the business unit „market management and communication“ and is, amongst others, responsible for communication and campaigns concerning safety.

He started his career at the Austrian Railways (ÖBB) in 2007 at the ÖBB-Holding AG as spokesperson for rail infrastructure.

Title of presentation: ILCAD 2019 in Austria

Summary:

The presentation and the video deals with the ILCAD activities in Austria in the recent years, focusing on the special train rides for “multiplicators” where train drivers are discussing with the participants (there are always two train drivers at the train – so one is “free” for discussion”). They are talking about their experiences, accidents at level crossings and “nearly” accidents. This creates awareness for all the listeners/participants, who can also “look the train driver over the shoulder”. This demonstrates the limited possibilities to stop the train in case of emergency in time.

Act safely at level crossings
