ILCAD, spearheaded by the UIC draws railway industry representatives, road authorities, academics and more from around the world - aims to raise awareness about the dangers associated with the road/rail interfaces (level crossings).

The International Level Crossing Awareness Day

is a joint commitment that began in 2009 with ELCAD (EU countries + Israel). Since then, UIC has been coordinating this worldwide event to raise public awareness about the dangers at level crossings.

The 10th edition of ILCAD

was held on **June 7, 2018**, with over 40 countries in attendance and was officially launched through a press conference and a roundtable. The event was hosted by the Croatian railway infrastructure manager, **HZ Infrastruktura**, together with the **Faculty of Transport and Traffic Sciences**.
